

# BROWNING TRAIL CAMERAS 2019 COMPARISON CHART

## SD CARD MANAGEMENT

By turning the SD Card Management feature ON, the camera will erase the oldest picture or video files on the SD card when the card becomes full. This will allow the camera to continue taking pictures if you cannot get to the field to swap out the SD card. If the SD Card Management feature is turned OFF, when your SD card fills up, the camera will not record any additional pictures or videos when triggered until you change the SD card or delete the images.

## MODELS W/FEATURE

BTC-4, BTC-5HDE, BTC-6HDE, BTC-7FHD-P, BTC-8FHD-P, BTC-4-14, BTC-5HD-850, BTC-6HD-940, BTC-9D, BTC-10D, BTC-7FHD-PX & BTC-8FHD-PX

## SMART IR VIDEO

Smart IR Video is a feature that will allow a daytime video clip to keep recording as long as the camera detects movement during filming. If the subject stands still in front of the camera and the camera does not detect movement the camera will end the video clip. The maximum record time for a video clip using this feature is 5 minutes during the day and 20 seconds at night or when the flash is being used.

*Smart IR Video for the 2019 line-up is now 2 mins versus the previous max of 5 mins.*
